An associate when it comes to software development with experience in both Frontend Development using Typescript and NextJS Framework, and Backend Development using Microsoft .Net Core. Also have experience when it comes to Cloud Architectures and DevOps using Microsoft Azure. Currently, my interest lies with Development using AI workflow.

Work Experience

SWR Technologies

Technical Support Specialist (Backend Engineer)

February 2024 - April 2025

- Supported an Australian-based production application leveraging Microsoft Azure, Azure DevOps, .Net Core for backend, Angular for web, and Java for mobile development. Primary focus on Azure Cloud and backend development.
- Actively participated in weekly and ad-hoc team meetings, providing regular updates. Proactively addressed incoming requests through daily email and JIRA ticket monitoring, prioritizing tasks effectively.
- Contributed significantly to enhancing the existing solution by developing and implementing new features and updates.
- Collaborated closely with QA by providing timely updates on all changes released to the QA environment.
- Proficiently analyzed customer requests and extracted relevant database information.
- Effectively investigated customer-reported issues, providing both short-term and long-term resolutions.
- Responsible for deployment of changes in the API, web, and mobile app (submitted to Google Developer Console) changes.
- Monitored Azure Services insights for the backend solution, identifying and reporting unusual API activities.
- Developed comprehensive documentation for all new features and updates.
- Collaborated with third-party ERP systems to investigate and resolve customer-reported problems.
- Provided detailed email reports to clients, clearly outlining the root cause of issues and discussing effective solutions.

Front-end Engineer

June 2023 - April 2025

- Joined an international web development project utilizing Next.js.
- Improved website SEO through strategic optimization techniques.
- Actively participated in customer meetings, providing regular updates and effectively communicating project progress.
- Developed high-quality web pages that precisely matched customer design specifications, incorporating feedback effectively.
- Consistently contributed to daily stand-up meetings, providing updates on completed tasks and identifying potential roadblocks.
- Actively engaged in retrospective sessions for both personal and team growth and improvement.
- Contributed to internal projects by integrating mobile features into the project website.

- Designed and developed responsive web pages that seamlessly adapt to all screen sizes, from mobile to large desktops.
- Actively participated in discussions regarding internal projects, contributing valuable insights and suggesting potential future enhancements.
- Effectively reviewed and approved pull requests to maintain code quality and consistency.

Backend Developer Intern

February 2023 - May, 2023

- Successfully completed a comprehensive software development training program, covering essential tools, languages, and methodologies.
- Participated in backend development training, enhancing technical skills.
- Developed robust APIs using Nest.js, aligning with the provided UI/UX design and frontend developer requirements.
- Provided clear and concise documentation for all developed APIs, facilitating seamless integration for frontend developers.

Education

Camarines Norte State College

Daet, Camarines Norte

Bachelor of Science in Information Technology
